

WADER CLEANING STATION

Help protect our fishing areas

Take these steps **BEFORE** and **AFTER** visiting the river to stop **INVASIVE SPECIES** that could be hitchhiking on your gear.

- 1** Drain all water from your waders, boots and gear. 
- 2** Use the three-sided boot brush below to remove mud and debris from your boots.
- 3** Use the long-handled brush to scrub off any remaining mud and debris from your waders and boots.

If you have fished out-of-state or in invasive-species-infested waters within the past five days, further decontamination of gear may be necessary.

For more information,
contact the River Alliance
of Wisconsin at
(608) 257-2424 or visit
